4. TEACHING.

During my life from 1978 till now I taught different courses in Moscow, Yerevan and Manchester in Mathematical and Theoretical Physics and in Mathematics: Electrodynamics, Quantum Mechanics, Differential Geometry, Applications of Differential Geometry in Theoretical Physics, Group Theory, Homological methods in Physics, Galois Theory, Elements of Functional analysis e.t.c. Now I teach the new courses: the course "Introduction in Geometry" for second years students and the course "Riemannian Geometry" for third and forth year students.

Supervision of research students

:

Last 12 years I share my PHD students with Ted Voronov. I supervised these years 8 PhD students. Five of them already finished their thesis.

One of my former PhD students (Armen Nersessian) nowdays is the leading researcher in mathematical physics in Yerevan, Armenia.

I regularly supervised projects of undergraduate and master students in Galois Theory and Differential Geometry and I supervised dissertations an dprojects of MSC students.

I was four times internal examiner and three times the external examiner (Aberdeen 2010, Loughborough 2012, 2013) in PHD oral examinations.

I make regularly projects with foundation year students.

5. Social Activity.

1. From 2001 I am helping on the regular basis in organising weekly sessions of Manchester Geometry Seminar

2. From 2003 till 2006 I was responsible for organising staff development proccess in our Department.

3. From 2007 till 2010 I was a member of promotion commitee in the School of Mathematics.

4. I am actively interesting in the process of mathematical education of children in UK. I prepared the talk "Euler Theorem for polyhedra" which I give during interview days for sixthformers. In March 2005 I participated in the conference "Where will the next generation of UK mathematicians come from?"

I had three lectures for general audience in the School of Mathematics

February 2008 "Tubes formula"

November 2012 "Mean algebraico-arithmetic"

November 2013 " Chebyshev approximation and Helly's Theorem"

5. Now I am fire marshal in our School.
